Decision: major revision

Dear Dr Arpin,  
Your manuscript, "A Unique Perspective on Vulnerability and Route Dynamics in the Global Liner Shipping Network", has now been assessed.

The reviewer and myself both agree that there is quite the work to be done in order for the manuscript to be considered for publication. This major revision will need to include a bigger discussion in the advances that optimization and network science have done in the last few years for resilience studies. I echo the recommendations of the reviewer and I urge you to update carefully the literature review and the introduction, as well as update the methodological aspects of the manuscript to be in line with the recent advancements. I want to thank the reviewer for doing such a great job identifying pertinent literature and avenues for you and your team to continue on.

Overall, I would like to invite you to revise your paper and perform these major revisions asked by the reviewer. When your revision is ready, please submit the updated manuscript and a point-by-point response.

Dear Dr Arpin,  
Your revision of your manuscript, "A Unique Perspective on Vulnerability and Route Dynamics in the Global Liner Shipping Network", has now been preliminary assessed.

During the screening, I observed that some of the references mentioned in the document are absent from the reference list, or are incorrectly referenced. For example: in Page 4, last paragraph "Calatayud et al." is not referenced numerically to the reference in the end, or in Page 6, second paragraph "Camur et al." is also not provided in the reference list correctly. In general, the referencing is inconsistent, with some publications being referenced numerically, others by name and year, and others both. Additionally, some publications are missing from the reference list in the end of the manuscript.

Can you make these corrections? When you have, I will make sure the work is reviewed by the same set of reviewers. When your revision is ready, please submit the updated manuscript and a point-by-point response.
